

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

#### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims

1. (canceled).
2. (previously presented): The method of claim 5 further comprising providing selected graphic files for playing within each said corresponding at least one set of files for each of said first plurality of computers.
3. (original): The method of claim 2 further comprising providing selected audio files for playing within at least one of the corresponding at least one set of files.
4. (previously presented): The method of claim 5 wherein at least two of said corresponding at least one set of files comprise different graphic files contained therein.
5. (previously presented): A method for making a presentation for display on a first plurality of computers forming respective computer stations, utilizing a software control program, said method comprising:

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

installing said software control computer program on each  
of said first plurality of computers for the control  
of at least one unlike graphical image display by the  
respective computer;

installing a corresponding at least one set of files to be  
played for said presentation on each of said first  
plurality of computers, each set of files including an  
initial file to be played and an ending file to be  
played;

associating playing time for each set of files of said at  
least one set of files on each of said plurality of  
computers such that an effective beginning time and  
play duration time is associated with each file of the  
corresponding at least one set of files;

providing a start time for each initial file of said at  
least one set of files to be played on each of said  
first plurality of computers;

providing that each computer is synchronized to a common  
time;

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

providing that in each instance of controlling an unlike graphical image display said control program on each of said first plurality of computers that said control program displays said initial file to each set of the corresponding at least one set of the files at said start time;

sequentially playing each file in each corresponding at least one set of files for each of said first plurality of computers; and

running at least one instance of running a second plurality of simultaneous and independent executions of said software control program on a respective computer of said first plurality of computers such that said respective computer controls a corresponding second plurality of unlike graphical image displays and further such that each instance of simultaneous and independent execution of said software control program coordinates a display sequence for a respective one of said corresponding second plurality of unlike graphical image displays.

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

6. (previously presented): The method of claim 5 wherein said effective beginning time and play duration time are determined on the basis of a beginning time and an ending time.

7. (previously presented): The method of claim 5 wherein said effective beginning time and play duration time are determined based on a collective time of previous image files and a given play duration time.

8-10. (canceled).

11. (previously presented): The software control program of claim 13 further comprising a second display command to designate a particular set of presentation display files of said at least one set of presentation display files for a desired monitor of a multiple monitor computer.

12. (original): The software control program of claim 11 wherein:

there is associated with each respective monitor of a multiple monitor computer in computer local storage a display raster area which is a part of a composite

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

raster area for all the monitors of the multiple  
computer monitor; and

said display command designates a particular monitor for  
said particular presentation display by setting an x,  
y position within said composite raster area  
identifying the desired raster area for said  
presentation display.

13. (currently amended): A software control program operable for  
running simultaneously on a first plurality of computers to  
control a presentation utilizing said plurality of computers, each  
of said computers being associated with at least one presentation  
display, each of said computers comprising a local storage wherein  
said local storage contains at least one set of presentation  
display files to be displayed during a presentation, each said set  
of presentation display files including at least one subset of  
graphical image files, said at least one set of presentation  
display files including at least one unlike subset of graphical  
image files, at least one scenario file for each of said plurality  
of computers which comprises timing and sequence information for  
each one of said at least one set of presentation display files in  
said local storage, said software control program comprising:

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

a read scenario command to read each scenario file of said at  
least one scenario file for each of said plurality of  
computers;

at least one get image command to retrieve each graphical  
image file of a respective at least one subset of  
graphical image files of a respective set of  
presentation files listed in each scenario file;

a software timing control operable for coordinating of  
display of each graphical image file for each of said  
plurality of computers;

at least a first display command to designate a set of  
presentation files of said at least one set of  
presentation files for a desired one of said first  
plurality of computers;

a time control program for setting an internal clock of all  
of said plurality of computers to a common time[[:]];  
and

said software control program further being operable to  
control the associated presentation of said graphical

In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

image files to provide at least one instance wherein a scenario causes the running on a respective computer of a second plurality of simultaneous and independent executions of the software control program such that the computer controls a corresponding set of said at least one set of presentation files and further such that each instance of simultaneous and independent execution of said software program coordinates a display sequence for a respective subset of unlike graphical image files.

14. (canceled).

15. (previously presented): The method of claim 19 further comprising providing that said sequences of presentation displays differ among said first plurality of computers.

16-17. (canceled).

18. (previously presented): The method of claim 19 wherein the step of automatically starting further comprises providing a initial file start time for each instance of said software control program on each of said plurality of computers.

Application Serial No: 09/977,900  
In reply to Office Action of 17 May 2005

Attorney Docket No. 80072

19. (previously presented): A method for making a presentation for display on a first plurality of computers synchronized to a common time forming respective computer stations, utilizing a software control program, said method comprising:

installing said software control program on each of said first plurality of computers for the control by each computer of a presentation display, each presentation display comprising at least one set of presentation files, each set of presentation files installed on each respective one of said first plurality of computers, each at least one set of presentation files including at least one subset of graphical image files having at least one unlike graphical image file;

simultaneously running each installed software control program on the respective computer on which installed;

automatically starting a sequence of presentation files for each of said first plurality of a computer utilizing the respective control program of the simultaneously running control program installed thereon, said automatic start of a sequence being based upon a predetermined time of said common time to which said

Application Serial No: 09/977,900

Attorney Docket No. 80072

plurality of computers are synchronized; and

said simultaneous running including at least one instance of running a second plurality of simultaneous and independent executions of said software control program on a respective computer of said first plurality of computers such that said respective computer controls a corresponding second plurality of unlike graphical image displays and further such that each instance of simultaneous and independent execution of said software control program coordinates a display sequence for a respective one of said corresponding second at least one of said unlike subsets of graphical image files.

20. (canceled).
